

# Bachelor of Science in Health Services Management

## 120 credits

### Program Description

The Bachelor of Science in Health Services Management prepares the students to perform successfully in primary and intermediate management in health service organizations. What distinguishes these professionals are their knowledge in the field of public health, in the field of management and integration of both fields. In this way, it will ensure the balance between the provision of public health services and an effective administration.

### Program Objectives

1. Provide the health industry, both in the public and private sectors, with specialized human resources in Health Services Management.
2. Contribute to the training of professionals capable of establishing creative and cost-effective strategies in the search for alternatives that keep the organization at the highest levels of competence.
3. Prepare professionals with the necessary leadership that allows them to lead the development and improvement of the health programs in which they work.
4. Develop professionals who possess the skills of collaborative and teamwork that can maintain group cohesion and optimal productivity.
5. Train professionals who possess the knowledge and technical skills that allow them the best job performance in the management of health services and public health in general.
6. Develop professionals who have the sensitivity, commitment and dedication that allows them to establish affective and effective communication.
7. Train professionals who can compete favorably in the employment market, both in Puerto Rico and abroad.

Program sequence will be available at the time of enrollment.

The language of instruction and program delivery modality are subject to availability.
